A dream to revitalize Nepali blacksmiths and their smithy

With the support of Eloranta Fellowship, Jeff and MISTI-South Asia

Robert Koirala

University of California San Diego

Oct 19, 2022

Blood, sweat, and tear

Overview

1. History
2. Problems of blacksmithing
   - Safety
   - Financial problem
   - Knowledge transmission
3. Proposed solutions

A lost history of blacksmiths in Bhojpur: nothing is documented

A lost history of blacksmiths in Bhojpur: nothing is documented

There is hardly any metalworks that blacksmiths can't make

There is hardly any metalworks that blacksmiths can't make

Nepal depends on blacksmiths because farmers do

Blacksmiths don't have safety training

There isn't much financial incentive

Younger generation are running away from the profession

Profession is restricted to certain caste and genders

Profession is restricted to certain caste and genders

Blacksmiths are engineers; we should learn and expand on their knowledge

- Safety training: government

Blacksmiths are engineers; we should learn and expand on their knowledge

- Safety training: government
- Jobs for blacksmiths in schools

Blacksmiths are engineers; we should learn and expand on their knowledge

- Safety training: government
- Jobs for blacksmiths in schools
- University should serve as patrons: plan to work with Mike to design a course at MIT.

Thank you!
